

Green Digital

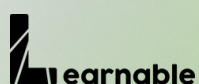

Improving the environmental sustainability of ICTs in companies

The project

Green Digital is a 2023 Small Scale Cooperation Partnership in vocational education and training sector (KA210-VET) funded under the Erasmus+ Programme

Partners

Learnable (Italy)

E.C.E.C.E. (Austria)

The Common Ones
The Common Ones
(Denmark)

Results

1. Green Digital Toolkit

for managers and workers aiming at implementing effective strategies for the sustainable use of ICTs.

2. Green Digital Workshops

aiming at supporting workers and managers in improving their knowledge, skills and competences for more sustainable and effective use of ICTs in companies

3. Green Digital Launch Conference

in each partner country for promoting the project results and raising awareness about ICTs' environmental sustainability for companies
